Claims 7, 8, 10, 19, 20 and 22 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kawabata (705), Kawabata (610) or Kanayama.

Kawabata (610) teaches conductive bonding agent e.g. #21, #86 (various figures) connecting a piezoelectric transformer to a PCB. Kawabata (705) teaches conductive adhesive #122(a) and #27 to connect a piezo transformer to a PCB. Kanayama uses a lead frame bond (#36) between the piezo transformer and a PCB. Since "a first amount" and "a second amount" described in the claims have no identity in the final product (only one single blob of conductive adhesive) the claim limitations are fully met by the single blobs of conductive adhesive used by the references. However, assuming arguendo, that the "first and second amounts have some separate structural identity in the final product it must be noted that making parts integral or separable has long been held to be within the skill expected of the routineer. Thus providing the conductive bonding as multiple elements would have been obvious to one of ordinary skill in the art.

Claims 9, 11, 12, 21, 23 and 24 are rejected under 35 U.S.C. 103 as unpatentable over Kabawata (705), Kabawata (610) or Kanayama.

As noted above, the references each teach the piezo electric element mounted to a board via a conductive bonding agent. They do not explicitly teach the specific share hardness of the adhesive or some specific dimension. However, selection from among suitable materials and optimization of a known device (e.g.). Thru routine experimentation) have long been held to be

within the skill expected of the routineer. Thus selection of specific materials and optimal dimensions would have been obvious to one of ordinary skill in the art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
